Olena Tokova

Download My Resume

Olena Tokova

Hello! My name is Olena Tokova.

I have a bachelor's degree in applied mathematics. I like to analyze data and create mathematical models necessary for solving various problems and making decisions. This supports the forecasting of future events, optimizing processes, identifying cause-and-effect relationships, and increasing the efficiency of any processes and systems.

My Goal:

I aim to secure a long-term position in a company, with competitive compensation and a favorable work-life balance. My goal is to find a stable and fulfilling job that aligns with my skills and interests, allowing me to contribute to the company's success while also maintaining a healthy work-life balance.

This goal is important because: It aligns with my personal values and aspirations. First, securing a long-term position with competitive compensation is important to me as it provides stability and financial security. This allows me to plan for the future and achieve my financial goals. I believe that achieving balance between my professional and personal life is essential to maintaining a healthy and fulfilling lifestyle.
